

SATA QuickPort Duo

Docking station for 2 SATA HDDs

Two simply gets more done than one, and when in doubt it's better to have two. That's why SHARKOON added a second hard drive slot to its SATA QuickPort – redundancy is always good!

Two SATA HDDs can be inserted in the SATA QuickPort DUO: 2x 2.5" or 2x 3.5" or 1x 2.5" and 1x 3.5". PCs connect via USB or two fast eSATA connections. With eSATA each hard drive receives a dedicated port, while with USB the drives share the connection (the drives are displayed separately).

Rely on the SATA QuickPort Duo for multiple hard drive connections ...

Features:

- Provides the direct connection of two SATA HDDs to your PC
- Suitable for 2.5" and 3.5" SATA HDDs
- External interface: 1x USB 2.0 and 2x eSATA
