

3.5" BayExtension

The 3.5" BayExtension is a metal mounting frame which allows up to two 2.5" hard drives or SSDs to be mounted into a 3.5" drive bay of a PC case. Regardless of whether it is an internal 3.5" hard drive bay or a drive bay for floppy or card readers, the 3.5" Bay-Extension is compatible. Also, the mounting frame is compatible with most quick-locking systems. There are no issues connecting angled SATA plugs to the installed hard drive or SSDs: the underside of the mounting frame is shortened accordingly.

Features

- Suitable for up to two 2.5" HDDs and SSDs
- Fits into standard 3.5" mounting bays as well as in mounting bays for Floppy/card readers
- Dimensions: 120 x 102 x 24 mm (L x W x H)
- Weight: 88 g
- Color: Black

Package contents
