

MK3

The MK3 puts the focus on a classically minimalist look with an air-permeable front panel and a high level of functionality. Despite its compact micro-ATX form factor, the case is ideal for gaming PCs, office PCs, or multimedia stations thanks to enough space for even large pieces of hardware and installation room for up to eleven fans.

Features

- AIR-PERMEABLE FRONT PANEL**
 The MK3 has a front panel that has been designed to optimally support the airflow inside the case by allowing the easy entry of air from the outside.
- TWO PRE-INSTALLED FANS**
 A total of up to eleven fans can be installed in the MK3. Two 120 mm fans are already pre-installed – one behind the front panel and one on the rear panel.
- DUAL-RADIATOR SUPPORT**
 Those who prefer water cooling will also be happy with the MK3, as up to two radiators can be simultaneously operated, if required.
- COMPATIBLE WITH BTF MAINBOARDS**
 Apart from conventional mini-ITX and micro-ATX mainboards, the MK3 is also compatible with almost all BTF formats on the market.
- MODERN CONNECTION OPTIONS**
 To connect a wide range of mobile and peripheral devices, the MK3 has a modern TRRS and USB-C port on the front of the top panel.
- PLENTY OF SPACE FOR HARDWARE**
 The inside the MK3 has been designed to accommodate large graphics cards with a length of up to 41 cm. In addition, CPU coolers with a height of up to 17 cm can be installed, as well as power supply units with a length of up to 23.5 cm. And there is installation space for up to two 3.5" HDDs or three 2.5" SSDs.
