

# MK4 RGB STRIP

Functional and stylish: Despite its compact micro-ATX form factor, the MK4 RGB Strip has plenty of space for modern hardware and room for up to eleven fans. The case presents itself in a solid, classic look, while the front panel has an integrated RGB strip along the base of the air-permeable mesh, providing a subtle visual contrast with 16.7 million colors. On the top panel, the case is rounded off with up-to-date ports for a wide range of mobile and peripheral devices.

## Features

### ■ SUBTLE RGB ILLUMINATION

The MK4 RGB Strip is characterized by the front panel with its air-permeable mesh grille and its integrated RGB strip that gives the case its name and provides visual highlights across the entire RGB spectrum.

### ■ PRE-INSTALLED AIRFLOW

Two 120 mm fans are already pre-installed inside the MK4 RGB Strip – one behind the front panel and one on the rear panel. Up to eleven fans will find room in the case.

### ■ DUAL-RADIATOR SUPPORT

In addition to conventional fans, the MK4 RGB Strip also supports water-cooling solutions. If required, up to two radiators can be operated simultaneously.

### ■ ALSO FOR BTF MAINBOARDS

Apart from conventional mini-ITX and micro-ATX mainboards, the MK4 RGB Strip is also compatible with almost all BTF formats on the market.

### ■ GOOD CONNECTIVITY

On the top panel near to the front of the case, a modern TRRS and USB-C port are available for a wide range of mobile and peripheral devices.

### ■ PLENTY OF SPACE FOR HARDWARE

Thanks to a cleverly designed interior, the MK4 RGB Strip can also accommodate large graphics cards of up to 41 cm. In addition, CPU coolers with a height of up to 17 cm can be installed, as well as power supply units with a length of up to 23.5 cm. And there is installation space for up to two 3.5" HDDs or three 2.5" SSDs.
