

M30 RGB

With a refined and subtle design as well as an extensive mesh front panel, the M30 RGB proves to be a versatile case. A pre-installed 120 mm RGB PWM fan creates awesome lighting effects, while a tempered glass side panel allows a glimpse into the spacious interior. The temperature in the M30 RGB stays nice and cool thanks to the mesh front panel and the option of installing a 360 mm radiator behind the front panel or under the top panel.

Features

ATMOSPHERIC RGB ILLUMINATION

The M30 RGB is equipped with wide-ranging cooling options. Up to seven fans can be installed in the ATX case. A 120 mm PWM fan is already installed behind the front panel and a 120 mm RGB PWM fan is pre-installed on the rear panel. Thanks to the RGB controller, the case interior can be illuminated with radiant effects that can be viewed through the tempered glass side panel.

TIMELESSLY SIMPLE DESIGN

With a matte black finish and minimalist design, the M30 RGB has a timeless look that will suit all kinds of setup. This is highlighted by the front panel with its extensive mesh surface. The rounded edges emphasize the subtle design, while, at the same time, the front panel allows a substantial amount of air to be drawn into the case.

EASY OPTION FOR WATER COOLING

If water is preferred to air for cooling the hardware components, then the M30 RGB offers the possibility of installing a water-cooling system. Under the top panel or behind the front panel, there is space for a 360 mm radiator. Depending on the size of the mainboard and the height of the RAM, the radiator and its fans can have a height from 5 cm to 20 cm under the top panel.

MORE THAN YOU THINK

Apart from its subtle looks on the outside, there is a lot of space to be found on the inside. For a powerful build, large pieces of hardware with ample dimensions can be easily installed. Power supply units with a length of up to 22 cm or graphics cards up to 38 cm can be mounted in the case. The M30 RGB is equipped with a USB Type-C port for fast data transfer and optimal connectivity to modern mobile devices.

TIDY AND SIMPLE

A hassle-free installation of all the components is possible with the M30 RGB. In a few simple steps, hard drives or SSDs can be concealed inside the power supply tunnel or behind the mainboard tray. Thanks to the easily accessible cable pass-throughs, the cabling can disappear out of sight as well, and the inside of the case will be kept neat and tidy.

Specifications

Product Name	M30 RGB
Form Factor	ATX, E-ATX
Expansion Slots	7
Interior Painting	✓
Tool-Free Devices Installation	✓
Cable Management System	✓
Side Panel	Tempered Glass
Weight	7.20 kg
Dimensions (L x W x H)	45.7 x 22.0 x 48.8 cm

RGB Compatibility

Type	Addressable
Ports	4
Manual Control	14 Modes
Mainboard Compatibility	MSI Mystic Light Sync, ASUS Aura Sync, Gigabyte RGB Fusion Ready, ASRock Polychrome Sync
RGB Pinout	5V-D-coded-G

Max. Drive Bays

2 x 3.5" 4 x 2.5"

I/O

Type-C (USB 3.2 Gen 2) (Top): 1 USB 3.0 (Top): 2 Audio (Top): ✓

Fan Configuration

Front Panel	1x 120 mm PWM Fan (Pre-Installed) or Radiator* (Optional)
Rear Panel	1x 120 mm Addressable RGB LED PWM Fan (Pre-Installed)
Top Panel	3x 120 mm or 2x 140 mm Fan or Radiator* (Optional)

Compatibility

Mainboard	Mini-ITX, Micro-ATX, ATX, E-ATX
Max. Length Graphics Cards	38.0 cm
Max. Height CPU Cooler	17.2 cm
Max. Length PSU	22.0 cm
Height of Radiator incl. Fan	Front: Max 6.0 cm Top: 5.0 cm - 20.0 cm**

Package Contents

M30 RGB, Accessory Set, Manual

EAN Code

M30 RGB	4044951037940
---------	---------------

* 360 mm radiator installation can be either on top or front panel
** Depending on mainboard size and height of RAM
