

S25-V

The S25-V is an ATX midi tower which combines a design made for high-end hardware with a classically minimalistic and straightforward appearance. With its various installation possibilities, the S25-V is suitable as either a gaming case, a media center or an office PC. There is space for up to seven fans, numerous drives and larger versions of graphics cards, CPU coolers and power supplies. The S25-V is completed with features such as removable and easy-to-clean dust filters, a cable management system and an easily detachable front panel.

Features

STRAIGHTFORWARD CASE DESIGN

Although the S25-V has a layout which is fully made for gaming, the classic and minimalistic design addresses gamers who want, above all, to just concentrate on the essentials. With its low-key design, the S25-V is ideal as an unobtrusive gaming PC, media center or office PC, suitable for any room at home or at work.

IDEAL AIRFLOW FOR ANY SETUP

Apart from a pre-installed 120 mm fan on the back panel and another pre-installed fan at the front, the S25-V can incorporate up to five more fans for a customized airflow. One of these fans can be located at the front, another in the HDD/SSD cage at the bottom of the case, and three more fans can be mounted under the top panel. Of course, instead of fans, a radiator of up to 280 mm can be installed behind the front panel.

CLEVER DUST PROTECTION

The front panel of the S25-V has numerous air inlets (which are only visible from the sides of the case) to ensure a supply of cool air. So that the inside of the case is sufficiently protected from dust, there are dust filters behind the front panel, on the top panel and on the bottom panel. All the dust filters can be removed and cleaned. The dust filter on the top panel is conveniently attached with a magnetic fastening.

SYSTEMATIC TIDINESS

Apart from a power supply tunnel, which houses the power supply together with its cabling, the S25-V also has cable pass-throughs to ensure that the entire cabling is tidy. An opening in the mainboard tray facilitates the installation of CPU coolers. Another advantage of the S25-V is the cable-free design of the front panel: The panel can be easily detached without having to disconnect any wiring.

VARIOUS INSTALLATION POSSIBILITIES

The S25-V offers sufficient room for the installation of larger components. Graphics cards with a length of 40 cm, CPU coolers with a height of up to 16.7 cm as well as power supplies with a length up to 20.5 cm can all be accommodated within the case. In addition, up to six SSDs and three 3.5" HDDs will find room. Even two optical drives can be installed. The drive mounts can also be removed if desired.

Specifications

Product Name	S25-V
Form Factor	ATX
Expansion Slots	7
Interior Painting	✓
Tool-free Devices Installation	✓
Cable Management System	✓
Side Panel	Metal
Weight	6.5 kg
Dimensions (L x W x H)	45.0 x 21.0 x 46.5 cm

Max. Drive Bays

2 x 5.25" | 4 x 3.5" | 4 x 2.5"

I/O

USB 3.0 (Front): 2 | Audio (Front): ✓

Fan Configuration

Front Panel	2x 120 mm Fan (1x Pre-Installed, 1x Optional) or Radiator (Optional)
Rear Panel	1x 120 mm Fan (Pre-Installed)
Top Panel	3x 120 mm or 2x 140 mm Fan (Optional)*

Compatibility

Mainboard	Mini-ITX, Micro-ATX, ATX
Max. Length Graphics Card	40.0 cm
Max. Height CPU Cooler	16.7 cm
Max. Length PSU	20.5 cm
Max. Height Radiator incl. Fan (Front)	5.5 cm

Package Contents

S25-V, Accessory Set, Manual

EAN Code

S25-V 4044951019298
