

## S25-W

The S25-W is an ATX midi tower which combines a design made for high-end hardware with a classically minimalistic and straightforward appearance. With its various installation possibilities, the S25-W is suitable as either a gaming case, a media center or an office PC. There is space for up to seven fans, numerous drives and larger versions of graphics cards, CPU coolers and power supplies. The S25-W is completed with features such as removable and easy-to-clean dust filters, a cable management system and an easily detachable front panel.

### Features

#### FOCUSED ON THE ESSENTIALS

Although the S25-W has a layout which is fully made for gaming, the classic and minimalistic design addresses gamers who want, above all, to just concentrate on the essentials. Due to low-key design of the S25-W, the main highlight will be the installed hardware behind the large acrylic window of the case. The pre-installed LED fan on the rear panel provides atmospheric lighting in blue, which is perfectly accentuated against the matt black of the casing.

#### READY FOR THE OPTIMAL AIRFLOW

The S25-W has a pre-installed 120 mm LED fan at the back and two pre-installed fans behind the front panel. In addition to this, four more fans can be installed for a customized airflow. One of these fans can be located in the HDD/SSD cage at the bottom of the case, while three other fans can be mounted under the top panel. Of course, instead of fans, a radiator of up to 280 mm can be installed behind the front panel.

#### CLEVER DUST PROTECTION

The front panel of the S25-W has numerous air inlets (only visible from the sides of the case) to ensure a supply of cool air. So that the inside of the case is sufficiently protected from dust, there are dust filters behind the front panel, on the top panel and on the bottom panel. All the dust filters can be removed and cleaned. The dust filter on the top panel is conveniently attached with a magnetic fastening.

#### SYSTEMATIC TIDINESS

Apart from a power supply tunnel, which houses the power supply together with its cabling, the S25-W also has cable pass-throughs to ensure that the entire cabling is tidy. An opening in the mainboard tray facilitates the installation of CPU coolers. Another advantage of the S25-W is the cable-free design of the front panel: The panel can be easily detached without having to disconnect any wiring.

#### VARIOUS INSTALLATION POSSIBILITIES

The S25-W offers sufficient room for the installation of larger components. Graphics cards with a length of 40 cm, CPU coolers with a height of up to 16.7 cm as well as power supplies with a length up to 20.5 cm can all be accommodated within the case. In addition, up to six SSDs and three 3.5" HDDs will find room. Even two optical drives can be installed. The drive mounts can also be removed if desired.

### Specifications

Product Name	S25-W
Form Factor	ATX
Expansion Slots	7
Interior Painting	✓
Tool-free Devices Installation	✓
Cable Management System	✓
Side Panel	Acrylic
Weight	6.5 kg
Dimensions (L x W x H)	45.0 x 21.0 x 46.5 cm

#### Max. Drive Bays

2 x 5.25" | 4 x 3.5" | 4 x 2.5"

#### I/O

USB 3.0 (Front): 2 | Audio (Front): ✓

#### Fan Configuration

Front Panel	2x 120 mm Fan (Pre-Installed) or Radiator (Optional)
Rear Panel	1x 120 mm LED Fan (Pre-Installed)
Top Panel	3x 120 mm or 2x 140 mm Fan (Optional)*

#### Compatibility

Mainboard	Mini-ITX, Micro-ATX, ATX
Max. Length Graphics Card	40.0 cm
Max. Height CPU Cooler	16.7 cm
Max. Length PSU	20.5 cm
Max. Height Radiator incl. Fan (Front)	5.5 cm

#### Package Contents

S25-W, Accessory Set, Manual

#### EAN Code

S25-W 4044951019304
