

VK3 RGB

With a spacious interior, the low-key look of the front panel and a tempered-glass side panel, the VK3 RGB is designed for gaming setups where it's the essentials that matter. Four fans are already pre-installed, while the ATX case offers space for up to eight fans or, alternatively, radiators with a size of up to 360 mm. Sufficient space is, of course, also provided for HDDs and SSDs as well as a tidy cable management.

Features

■ CLASSIC DESIGN

With the low-key look of the front panel and its tempered-glass side panel, the VK3 RGB is a straightforward case that puts the focus on showcasing the hardware build inside the case.

■ EXPANDABLE AIRFLOW

Three 120 mm fans and one 120 mm RGB LED fan are already pre-installed in the VK3 RGB, but this can be easily expanded to up to eight fans. The areas of air intake are protected by dust filters.

■ WATER-COOLING SUPPORT

For demanding systems, and instead of fans, the VK3 RGB can be equipped with a 240 mm or 280 mm radiator under the top panel and a 360 mm radiator behind the front panel.

■ SUFFICIENT SPACE FOR DATA STORAGE

Up to two 3.5" HDDs or four 2.5" SSDs can be conveniently installed in different locations inside the VK3 RGB.

■ CONNECTIONS NEAR THE FRONT

For peripheral devices, two fast USB 3.0 ports and a TRRS port for headsets are available on the top of the ATX case.

■ TIDY INSIDE

To keep the inside of the VK3 RGB orderly and tidy, the case is provided with a power supply tunnel as well as sufficient space for cable management.
