

SKILLER SFM12

The Sharkoon floor protection mat is entering its third round! To go with this, there are now three new motif designs, where the attention is especially drawn by a 3D depth effect. Apart from its eye-catching designs, the SKILLER SFM12 floor mat stands out, above all, due to its high degree of durability and a thickness of 5 millimeters that provides reliable protection of the floor surface from scuffs and scratches.

Specifications

Available Versions	Undertow, Wood, 3D Vortex
Size	Undertow: 140 x 100 cm Wood: 140 x 100 cm 3D Vortex: 120 cm (Diameter)
Material Thickness	5 mm
Surface	Polyester
Nonslip Base	✓

Package Contents

SKILLER SFM12

EAN Code

SKILLER SFM12 Undertow	4044951040018
SKILLER SFM12 Wood	4044951040025
SKILLER SFM12 3D Vortex	4044951040001

Features

THREE MOTIFS WITH 3D DEPTH EFFECT

As with all other Sharkoon floor protection mats, the SKILLER SFM12 sets the focus on uniquely special designs. With this third update of our floor protection mats, there are three motif designs, where a 3D depth effect sets the focus of attention. Whether it's swirls of water, rustic floorboards or a 3D funnel, the mats come either in the usual, trusted round form or, for the first time, in a totally rectangular format, allowing each particular motif design to come into its own.

OPTICAL ILLUSION WITH 3D VORTEX

In contrast to the other motifs in the SKILLER SFM12 series, colors are not the focus of the 3D Vortex design. Completely in black and white and with a round form, it creates the optical illusion of a funnel that could absorb the observer, or any chair placed on it.

UNDERTOW: THE POWER OF NATURE

The Undertow motif of the SKILLER SFM12 series focuses on the majestic, elemental power of nature. With strong blue colors, the water masses pull the observer down in a whirlpool. For this motif design, and to make it deliver even more impact, we have given the floor protection mat a rectangular format as if on a canvas.

RUSTIC AND NATURAL WITH THE WOOD-LOOK

The wood motif of the SKILLER SFM12 series simulates a rustic wooden floor with visually strong joints and grains as might be found in a wooden hut or in an old manor house. For this motif design, and to make it deliver even more impact, we have given the floor protection mat a rectangular format as if on a canvas.

OPTIMAL FLOOR PROTECTION

Thanks to a thickness of 5 millimeters, the floor protection mat dampens noise from the chair wheels, and the floor has an effective protection from scratches. The special durability of the SKILLER SFM12 together with its stitched edges will help prevent wear and tear and fraying edges over the years. If necessary, any scuff marks caused by chair wheels can be easily shaken out. With its silicone underside, the SKILLER SFM12 is another floor protection mat that won't let itself get pushed and will always stay firmly in place.
