

SM1

DISCRETE LAVALIER MICROPHONE FOR MULTIPLE APPLICATIONS

The SM1 from Sharkoon is a solid, metal lavalier microphone suitable for a wide range of applications such as lectures and presentations, video production, podcasts and streaming, or as an ideal complement to headphones. With its lightweight and compact size, the SM1 discreetly attaches to clothing or a headphone cable with a few simple steps. The durable clip ensures reliable cable routing, while the 250 cm long cable ensures maximum freedom of movement.

Features

CRYSTAL CLEAR VOICE RECORDING

The directional characteristic of the SM1 is unidirectional and therefore designed especially for crystal-clear voice recording. Frontal incoming sound is preferred for recording, while lateral incoming sound is accounted for extensive spatial sound. Sound coming from behind, however, is muted and not recorded. The SM1 is additionally equipped with a foam pop filter to assist against wind and movement noise. If necessary, the pop filter is easily removable. The SM1 connects via a 3.5 mm microphone plug (TRS) to all conventional PCs and notebooks with a corresponding microphone port.

Specifications

Type	Microphone
Design	Clip-On
Weight incl. Cable	31 g
Dimensions (L x W x H)	440 x 144 x 35 mm

Microphone Specifications

Direction	Unidirectional
Impedance	0.68 kΩ
Frequency Response	50 Hz - 16,000 Hz
Sensitivity	-68 dB ± 3 dB

Cable and Connectors

Connector	3.5 mm Microphone Plug (TRS)
Cable Length	250 cm

Package Contents

SM1, Manual
