

SKILLER SAC20 S4

The SKILLER SAC20 S4 is a set of keycaps that has been specially developed for the SKILLER SGK50 S4 in cooperation with the keycap specialist Tai-Hao. The translucent inscriptions of the keycaps are ideal for the keyboard's illumination. Thanks to the use of the polymer material PBT, the keycaps of the SKILLER SAC20 S4 are not subject to abrasion and maintain their original color. The set also includes a keycap puller tool.

Features

OPTIMIZED FOR THE SKILLER SGK50 S4

The SKILLER SAC20 S4 is available in two versions, one with 62 keycaps for the ISO layout and one with 61 keycaps for the ANSI layout. As an extra bonus, the sets also come with two Sharkoon keycaps and one Tai-Hao keycap.

ROBUST AND WEAR-RESISTANT

The keycaps of the SKILLER SAC20 S4 are made of high-quality PBT, using the double-injection process. This provides a particularly elegant and abrasion-resistant inscription for the keycaps. Compared to traditional ABS keycaps, they are also more resistant to developing a glossy look over time, and they always remain true to their original color.
