

SKILLER SGK50 Aviator Cable Set

The SKILLER SGK50 Aviator Cable Set is a striking addition for all kinds of keyboard. The coiled cable cuts a particularly fine figure in any setup, and thanks to the metal cable rod, it will retain its form even after a long period of use. The aviator connectors with their screw thread will provide a connection that is continually stable.

Features

■ STRIKINGLY DIFFERENT

In contrast to conventional cables, the coiled cable of the SKILLER SGK50 Aviator Cable Set is a real eye-catcher. The double textile sleeving of the cable enhances both the looks and the durability of the cable.

■ ALWAYS IN SHAPE

Thanks to the integrated cable rod, the cable retains its coiled form even after prolonged use and frequent movement of the keyboard.

■ STABLE CONNECTION

The SKILLER SGK50 Aviator Cable Set is connected to the keyboard via USB-C and to the computer via USB-A. The aviator connectors, from which the set gets its name, have a screw thread that ensures a stable connection at all times.
