SKILLER SGM2

The SKILLER SGM2 has a classic, ergonomic shape bordered by a fine line of RGB illumination. The design is combined with technical features that would be required for intensive gaming sessions, while unnecessary extras have been deliberately avoided to ensure the best value for performance. Thus, the SKILLER SGM2 offers an optical sensor with up to 6,400 DPI and a polling rate of 1,000 Hertz. In addition, there are two easily accessible thumb buttons and six selectable illumination modes.

Features

OPTIONAL RGB ILLUMINATION
Six different illumination effects in up to 16.8 million colors can be selected any time using the single switch on the underside of the SKILLER SGM2. If the illumination is no longer needed, the lighting can be simply switched off. The illuminated SKILLER logo is not only a colorful highlight, but it also indicates which DPI level has been selected.

IDEAL GAMING PERFORMANCE
The SKILLER SGM2 is just ideal for gaming with its polling rate of 1,000 Hertz as well as a lift-off distance of only one millimeter and an optical sensor with up to 6,400 DPI. The DPI switch allows the sensitivity of the mouse to be selected within four preset levels. To do this, the gaming mouse does not require any additional software.

ERGONOMIC RETRO DESIGN
The shape of the SKILLER SGM2 is very reminiscent of the classic designs of days gone by, and offers exceptionally ergonomic handling along with two easily accessible thumb buttons. The mouse is best suitable for right-handers with medium to large-sized hands. Rubberized sides also ensure a secure grip.

Specifications

Max. DPI/CPI | Min. DPI/CPI	6,400 | 400
Sensor	Optical
Chip	SPCP6651
