

Sharkoon

Sharkoon Backpack

Inventory upgrade:

Finally, with the Sharkoon Backpack, nothing will fall by the wayside! The backpack is made of robust polyester and has various compartments and pockets to ensure that your belongings are tidily arranged and safely transported to the next event. The most important items are readily accessible thanks to special compartments for notebooks and tablets and, in one of the padded shoulder straps, a special pocket for cash and cards. In the hidden pocket in the breathable back panel, larger banknotes and essential documents can be guarded out of sight. For full power, there is a practical USB charging port on the outside of the backpack leading to a connection for power banks inside.

EVERYTHING IN ITS PLACE

With a volume of sixteen liters, the Sharkoon Backpack has plenty of room for everything needed for gaming, office or the next city trip. Multiple compartments and pockets provide tidiness and easy access to your belongings. One of the compartments is padded for safely transporting notebooks, while another is suitable for holding a tablet in its protective cover. A strap with Velcro fastening prevents devices from falling out of the backpack.

ACCESS DENIED!

For important documents or cash, the Sharkoon Backpack has a hidden pocket in the back panel. When the backpack is being worn on the user's back, the pocket is concealed and is thus protected from unwanted access.

FULL POWER!

To stop you from running out of juice, the Sharkoon Backpack comes with a USB cable running from the inside of the backpack to a protectively covered type A port on the outside. When connected to a power bank, your mobile device can be conveniently charged. The power bank itself can remain inside the backpack, placed in a special pocket adjacent to the outside charging port.

DURABLE AND NICE TO WEAR

The outside material of the Sharkoon Backpack consists of robust 600D polyester which is immune to superficial scratches and, at the same time, is water repellent. The contents of the backpack are therefore protected from outside influences such as light showers or water spray. For optimally comfortable wear, the back panel and the shoulder straps are padded, and the perforation provides ventilation.

MOBILE COMFORT

For optimal use in everyday situations, the Sharkoon Backpack has as special pocket directly on the left shoulder strap for cash and cards, and there is another pocket on the top for quickly accessing larger items. A reflective stripe on the backpack provides better visibility during the dark. And if luggage has to be taken along, the trolley strap allows the backpack to be simply fitted onto the telescopic handles of trolley bags and suitcases.
